Read the text to answer questions 8 to 10.

The sugar glider is a marsupial, just like the many other Australian animals the kangaroo, the koala and the wombat for instance. The sugar glider is a possum – very similar to the *tupai* in Indonesia. It basically lives in trees. It eats leaves and fruit. However, the Australian sugar glider has a very special skill. It can jump from tree to tree like a *tupai* but it can also 'sort of fly' as well. In fact, it glides or *terbang layang* in *Bahasa Indonesia*. When it jumps from one tree to another it spreads its four legs out wide; and its extra skin also spreads out and functions like a parachute.

8. What does the text tell us about?
- The kangaroo
 - The koala
 - The wombat
 - The sugar glider
9. Why can the sugar glider glide from tree to tree?
- It can spread its four legs and skin out wide.
 - It is very similar to the *tupai* in Indonesia.
 - It basically lives in trees.
 - It eats leaves and fruit
10. "... it spreads its four legs out wide ...".

The underlined word means ...

- executes
- exceeds
- extends
- examines

Read the advertisement below and answer questions 11 to 13.

Find the spelling and pronunciation
more than 80,000 words

with this

electronic dictionary

The underlined word means an ordered set of ... which forms a word.

- a. alphabet
- b. sentences
- c. letters
- d. paragraphs

Read the following text and answer questions 14 to 15.

The Mightiest Archipelago

The Indonesian Archipelago is by far the world's largest group of 13.667 islands which stretches across 5,120 km (3,200 miles) of tropical seas like a string of emeralds. When superimposed on a map of North America, Indonesia stretches from Oregon all the way to Bermuda. On a map of Europe, the archipelago extends from Ireland past the Caspian Sea. More than 200 million people inhabit this archipelago. Known to anthropologists and naturalists as "The Malay equatorial line", the equatorial line is an imaginary line dividing the earth into two parts from east to west in the tropical zone. This makes Indonesia have two seasons, the wet and dry season. Because of its location many kinds of flora and fauna live here. According to the astronomical location, Indonesia lies between 6° North Latitude and 11° South Latitude and between 95° East Longitude and 141° East Longitude.

14. Where is Oregon?

- a. In Europe.
- b. In America.
- c. In Indonesia.
- d. On the equator.

15. What is paragraph one about?

- a. The length of Indonesia.
- b. The Indonesia's product.
- c. The size of Indonesia.
- d. The Indonesia's people.
